

# ET&D Partnership Construction Outreach Training Executive Summary

The Electrical Transmission and Distribution Partnership conceived of and subsequently developed the OSHA Electrical Construction Industry Outreach training course with the mind set of producing a non-traditional, industry specific training course tailored toward employees involved with the construction and maintenance of power transmission and distribution systems. Members from each of the entities listed below worked diligently to develop and implement this industry changing and industry challenging training course. Persons attending this course will receive training in the topics listed below. Each module is tailored specially toward the power transmission and distribution industry. Although this course is based on the current OSHA 1910 and 1926 standards, the course material also discusses consensus standards, industry accepted best practices, the OSHA Focus 4 topics in addition to equal-potential grounding and bonding, flame resistant clothing, electrical arc protection, and pre-job briefings. Students completing this course receive a traditional OSHA 10-Hour for Construction card marked with an ET&D Partnership designation.

TOPIC	CONTACT TIME	TOPIC	CONTACT TIME
Intro to OSHA	1 Hour	Rigging & Lifting	1 Hour
Electrical Safety	2 Hours	Confined/Enclosed Spaces	1 Hour
Grounding & Bonding	2.5 Hours	Trenching & Excavation	1 Hour
Personal Protective Equipment	1 Hour	Fall Protection	1.5 Hours
